PROFESSIONAL SUMMARY

Detail-oriented IT professional with hands-on experience in Application Support (L1) and exposure to monitoring, troubleshooting, and database operations in production environments. Skilled in incident handling, SQL-based diagnostics, system monitoring, and supporting backend systems. Capable of working in 24×7 operational environments, responding to critical issues, and collaborating with technical teams to ensure system stability and uptime.

PROFESSIONAL EXPERIENCE Application Support - L1 Net Core Nepal Pvt. Ltd (13 March 2025 – Present)

- ✚ Provided 24×7 application support readiness, handling user and system issues in web based production environments
- ✚ Monitored application behavior and assisted in identifying system performance issues and outages
- ✚ Performed incident troubleshooting and escalation with proper logs and root cause analysis
- ✚ Supported backend systems using SQL (MySQL/PostgreSQL) for data validation, corrections, and reporting
- ✚ Collaborated with developers and system teams to resolve production bugs and service disruptions
- ✚ Assisted in system updates, deployments, and post-release validation testing
- ✚ Maintained incident documentation and technical knowledge base for recurring issues
- ✚ Ensured data integrity and service continuity through validation and monitoring tasks
- ✚ Participated in problem management and service restoration activities under pressure

TECHNICAL SKILLS

Network & Infrastructure Concepts

- ✚ IP/MPLS fundamentals (conceptual understanding)
- ✚ FTTH / Fiber network basics
- ✚ Wireless network troubleshooting (WIFI systems) Basic understanding of SDH / transport networks
- ✚ Data center support coordination

- ✚ Nagios (adding/removing monitored elements, alert handling) - Basic Linux and Windows server troubleshooting

Technical Support Skills

- ✚ Incident management and documentation
- ✚ Root cause analysis (basic level)
- ✚ Escalation handling with proper logs

EDUCATION

BSc (Hons) Cybersecurity (2024)

University of Wolverhampton, UK

First Class Honors

Certifications

- ✚ Cisco Certified Network Associate (CCNA) - Cisco
- ✚ NETWORK+ - COMPTIA
- ✚ Certified in Cybersecurity – ISC2

PROJECT EXPERIENCE

CCTV Surveillance System and Fortinet Firewall Deployment (Government & Hospital Sites)

- Assisted in deployment and configuration of IP-based CCTV surveillance systems and Fortinet FortiGate across government and hospital environments
- Performed IP connectivity testing, device accessibility checks, and network troubleshooting to ensure smooth video transmission
- Assisted in ensuring secure network segmentation for surveillance systems in sensitive environments (hospital/government networks)
- Provided post-deployment technical support, including fault identification and connectivity issue resolution
- Supported firewall policy verification, rule validation, and basic configuration checks
- Assisted in troubleshooting network access issues between internal, DMZ, and external zones
- Worked with senior engineers to validate VPN connectivity, NAT rules, and security policies

WHY I'M A STRONG FIT

- Hands-on experience in live production support environments
- Exposure to incident management, outage tracking, and escalation workflows
- Strong understanding of system monitoring and troubleshooting processes
- Familiar with Nagios-based monitoring operations
- Ability to work in 24×7 shift-based, high-pressure environments

- Strong analytical skills for fault isolation and root cause analysis
- Solid foundation in networking concepts (TCP/IP, infrastructure basics)
